### GLIMMER Body Art Instructions

1. Choose a design.
2. Prepare the area where the glitter tattoo will be placed by cleaning it with an alcohol wipe. Make sure the area has no lotion or sun block.
3. Carefully peel the first two layers of the stencil (transparent & black layer) off of the backing.
4. Put the stencil on the desired area and make sure it is flat with the skin.
5. Peel off the top transparent layer and ensure the black stencil remains on the skin.
6. Apply the cosmetic gel. Make sure to cover the whole design.
7. Immediately remove the black stencil before the gel dries up.
8. Wait for the gel to dry, it becomes transparent when it is dry.
9. Apply the glitters on the design. Use a small tipped brush for multi-coloured design and a medium tipped for single designs. Always start from the bottom going to the top and from the outside going in.
10. Brush off excess glitter with a large brush.
11. If excess glitter remains on the skin, use a clear piece of scotch tape to remove.
