

# Red Dragon Sauna Pedicure System

Introducing an Entirely New Experience: The Steam Pedicure Elevates Traditional Pedicures to a New Level using Steam!

If you've worked in salons, spas or doctor's offices for long you're aware of the distinct drawbacks associated with traditional pedicures. Excessive water usage, sanitation and reduced visits during wintertime are just a few of the challenges you face. Finally, there's another solution that takes old-school pedicures to a whole new level using steam.

Doctors and therapists have long sung the praises of steam for treating muscular injuries, sports injuries, fibromyalgia, arthritis, rheumatism, skin irritations and countless other issues. Now you can offer the same expert therapy in your salon, spa or office. Plus, with the addition of a few drops of essential oils, it can also help to:

**Reduce stress & fatigue**  
**Detoxify the body**  
**And much more!**

**Improve outlook**  
**Increase circulation**

The patent-pending steam generator unit comes complete with time and temperature settings. In mere minutes, your clients' steam pedicure begins using only 1 cup of fresh, clean water per service. No more subjecting your patrons to water that's be used and reused day after day. The digital controls (complete with remote) allow you to set time and temperature limits for automatic shutoff.

## Environmentally Sound

Ordinary pedicures continue to flush over 118 million gallons of water down the drain every year. But the Red Dragon Sauna Pedicure system uses 16 times less of our valuable, natural resources because it's steam driven. It takes just 16 ounces of water per service.

## It's 100% Portable

No plumbing is needed with this innovative, portable pedicure sauna meaning you save the hassle and expense of hiring a plumber. Place it anywhere you like without concern for anything other than a common electrical outlet.

But ecological friendliness, portability and the amazing effects of steam aren't all this innovation has going for it. The Red Dragon Sauna Pedicure system opens a whole new way to generate additional revenue for your business or practice.

## Boost Income with this Portable Pedicure Sauna

The perfect addition for:

- Doctor's offices
- Cruise ships
- Booth renters
- Resorts
- Small salons
- And more

This unique sauna pedicure system can usher in an entirely new stream of income for practically any business because of its space-saving, portable design. Just imagine the possibilities of adding unique steam pedicures to your lineup of services.
