Dermaplaning is a method of exfoliation that consists of using a scalpel to gently scrape off the top layer of dulling dead skin cells, in order to reveal a smoother, brighter complexion.

Because dermaplaning is a quick procedure with few to no adverse effects, it has maintained strong popularity. Using a scalpel and a delicate touch, this is a great treatment to offer to clients who are pregnant or nursing who want a deep exfoliation, but are not allowed to use peeling agents on their skin. It is also a first choice for clients who have excess vellus hair on the skin, or for minimizing fine line & wrinkles, and giving your clients an overall healthy glow.

You'll also **SAVE 15%** on all Facial products purchased day of class! *(*Excludes EyEnvy & Equipment).*
